## CHAIN WHEELS

Chain wheels are an effective means of manually operating overhead hand geared trolleys & end trucks.... other applications are endless.

The hand chain operated wheel turns a shaft & pinion which meshes with steel gears for ease of operation and accurate spotting. The chain guide keeps the chain aligned with the wheel and helps prevent fouling.

Our standard 10" diameter chain wheel is cast in ductile iron grade 80-55-06 & finished with Industrial strength enamel. Chain wheels are designed to suit  $\frac{3}{4}$ " to  $1\frac{1}{4}$ " shaft sizes and  $\frac{3}{16}$ " alloy link chain (1" Std.).
